

Chick Checklist

- Brooder plate or heat lamp (*heat lamps can be a fire hazard so use caution)
- Brooder area: an enclosed area with good air flow that the chicks can grow and be kept safe
- Bedding (do not use cedar chips. These are toxic to chickens)
- Waterer: I suggest getting a small one at first to prevent accidental drowning and then transition to a larger waterer when they get older
- Feeder
- Chick feed or your choice
- Magic Water
- Coop: have your coop ready. They grow fast and will be ready to go outside between 3 and 4 months old
- _____

- _____
